

# Zulaiha

## Task: Modify Garage Manager Web Page

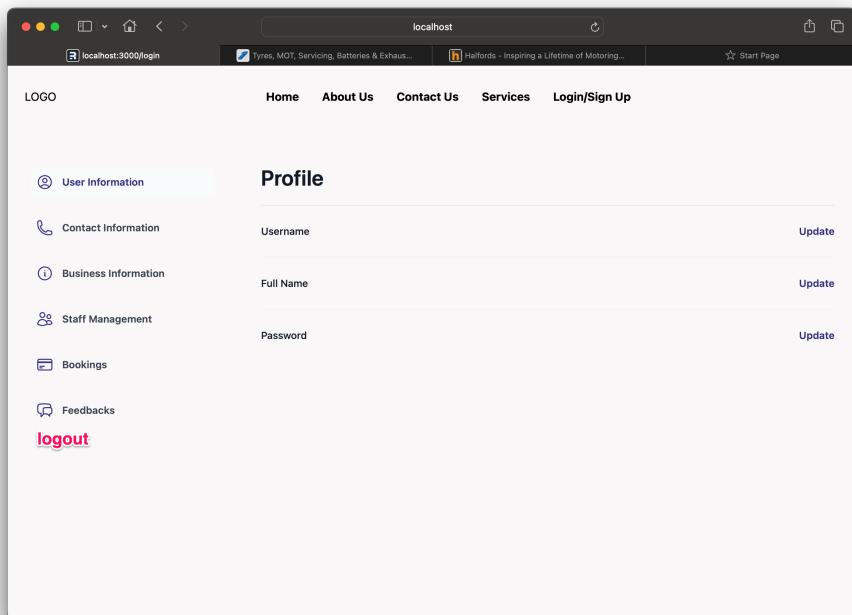

Step 1: Add a new section and rearrange existing sections

1. Business Management - Add this new section. This is where the business performance, booking trends, financial statistics and customer satisfaction overview will be shown (these tasks will be for later but for now add this new section please).
2. Staff Management
3. Booking Management
4. Feedbacks
5. Business Information
6. User Information
7. Contact Information

## Step 2: Add a logout button

Under the dashboard sections, add a logout button. Add a logout button on customer profile page as well please.

The logout button can just be an underlined text, similar to website on Halfords

The screenshot shows the official Halfords UK website's 'My Account' page. At the top, there's a navigation bar with links for Track Order, Opening Times, Gift Cards, Motoring Club, Trade Card, and a search bar. Below the navigation is a banner for Black Friday deals. The main content area shows account details like address, saved items, and vehicle information. On the left, a sidebar menu lists options such as Bookings & Orders, Personal Information, Saved for Later, My Preferences, My Vehicles, Rewards & Benefits, Trade Card, and My Subscriptions. The 'My Subscriptions' item has a red arrow pointing to its 'Sign Out' link.

# Task: Create Administrator Web Page

The web page is similar to Garage Manager. Dashboard sections are:

1. Booking Management - This section displays bookings in a calendar. Filtering system (day/week/month)
2. Customer Management - This section displays existing customers. The Admin staff can edit details and create new customer accounts.
3. Business Information
4. User Information
5. Contact Information
