Ethan

Task: Create 'Select Centre' Web Page

Step 1

Once the user clicks 'Submit' button in the Home page, it should either:
- Redirect to a web page (you have to create a new web page)
- Or expand the div (similar implementation -> https://www.f1autocentres.co.uk)

The submit button should check if:
- The registration number text box is left empty (display a message 'Please enter registration number).
- The postcode text box is left empty (display a message 'Please enter postcode).

```
Wisdom will implement API for vehicle registration and postcode location using
Google Maps and the 'Submit' button will:
- Check if the Registration is recognised
- If not recognised, a pop up message displaying 'Vehicle registration isn't
recognised'
- Check if the postcode entered is correct
- If not recognised, a pop up message displaying 'Invalid postcode'
```

Step 2

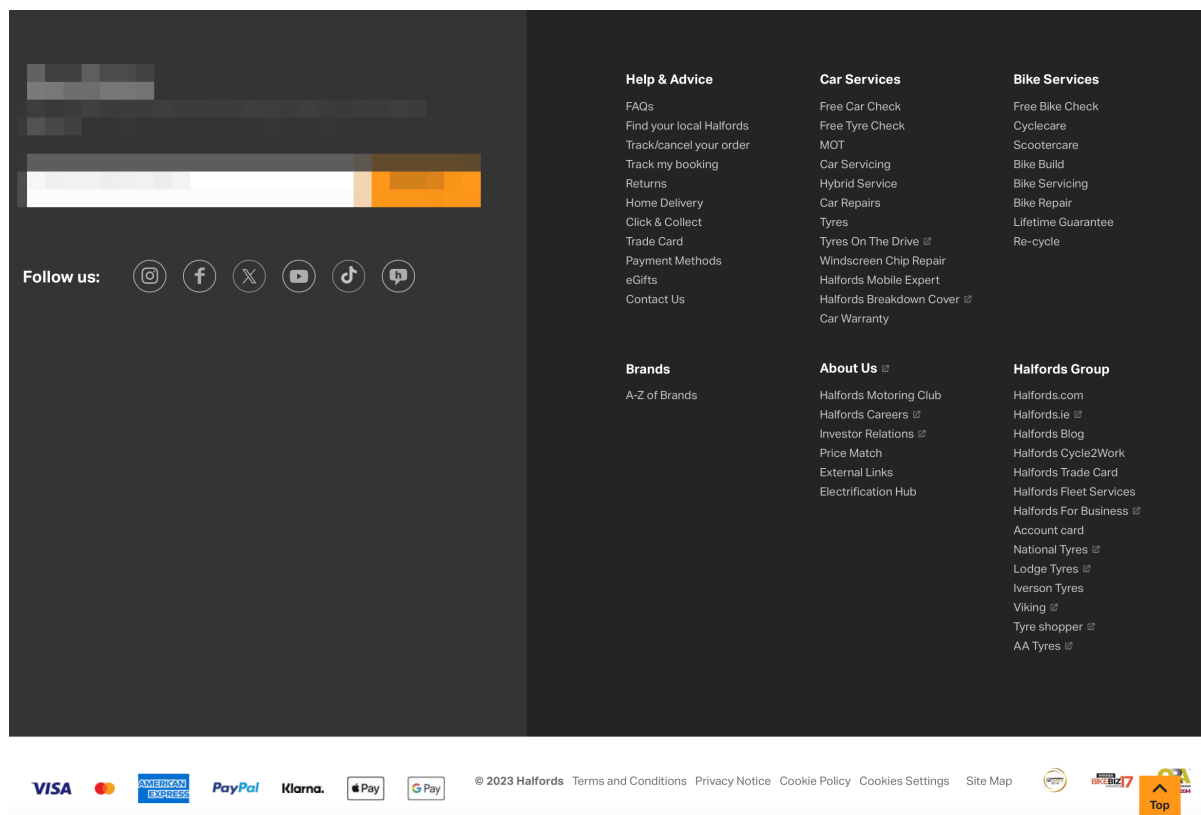

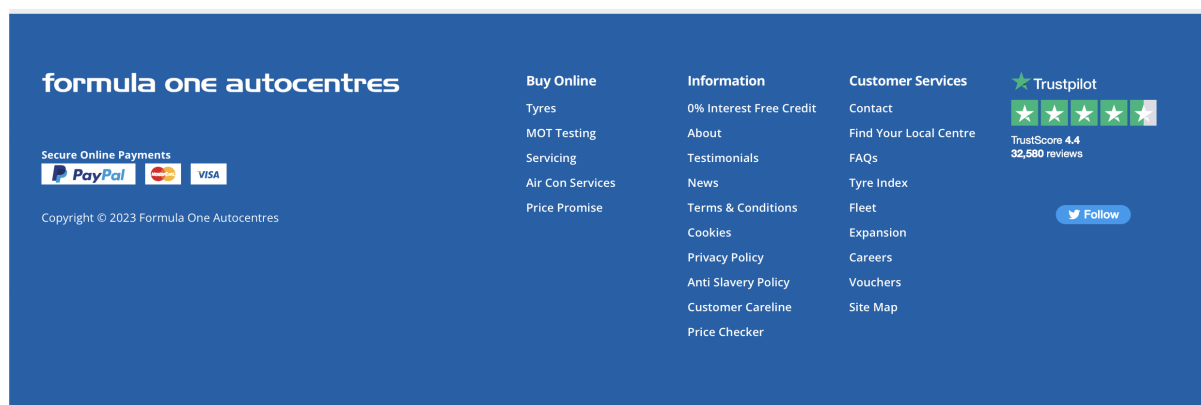

You should prepare the circled area for Wisdom and the rest of the information will be populated from the API.

Task: Add Footer to Web Pages

Something similar to the images below. The website footer should be displayed in all webpages. Zulaiha previously worked on creating footer so you may ask her for help.

website -> https://www.halfords.com

website -> https://www.f1autocentres.co.uk

In the footer page you should include:

Social Media Links:
Social Icons (similar to halfords) Icons and acts like links social media websites. For example, clicking Instagram icon will open new tab to https://www.instagram.com
- Instagram
- Facebook
- Twitter
- YouTube

Download images: https://icons8.com/icon/set/social-media/material-outlined

Navigation Links:
- About Us: Takes to the About Us page.
- Services: Takes to Services Page.
- FAQs: Takes to FAQs page (web page isn't created yet).
- Contact Us: Takes to contact us page.
- Site Map: A link to a site map that provides an overview of the website's structure and navigation (web page isn't created yet)

Legal Links:
- Privacy Policy
- Terms and Conditions
- Cookies

Back to Top Button:
A small "Back to Top" button that allows users to quickly return to the top of the page.
